Free parking after 5:00 PM at CPS parking garage on Navarro St.

☀ *RSVP Link:* <https://www.facebook.com/events/2091841401095644/>

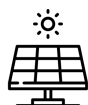

How does the “Flexible Path” fail to address the climate crisis?:

- Envisions the continued use of coal and natural gas through 2042
- Adds almost no additional renewable energy until nearly 2030

Why it’s important for the us, the community, to show up:

- This is a unique opportunity to voice:
 - Opposition to using fossil fuels (coal and natural gas)
 - Our demand to rapidly switch to renewable energy
 - Influence the CPS Energy decision-making process.

Climate Action SA Goals for CPS Energy Electricity Generation:

- Coal-Free by 2025
- Fossil Fuel-Free by 2030

What YOU can do:

- Wear blue and bring posters to show your support!
- Call at least 5 friends, family members, or network contacts to inform them of the event and ask them to call 3 - 5 people themselves
- Sign up to speak (2-3 minutes and you don’t need to be an expert!) and advocate for any the following:
 - Closure of Spruce coal plant no later than 2025
 - Rapid transition to renewable energy
 - Much more transparency of CPS decision-making processes
 - Add Citizens To Be Heard at CPS Board Meetings
 - Open Citizens Advisory Committee Meetings to the public
 - Aggressive investment in energy efficiency
